Education

P.R Pote Patil College of Engineering (Amravati)

June 2024

B.E. in Computer Science & Engineering CGPA: 8.36/10

Centre for Development of Advanced Computing (CDAC), Pune

Aug 2024

PG-Diploma in Mobile Computing (PG-DMC)

Projects

Tour Booking Website

Sep. 2025

Node.js, Express, MongoDB Atlas, Pug, Stripe, SendGrid, Leaflet.js

- Developed a full-stack booking platform where users can register, log in, browse tours, and complete secure bookings
- Implemented JWT-based authentication with role-based access control to separate admin and user privileges
- Integrated Stripe for payments and SendGrid/Mailtrap for transactional emails (welcome, booking, confirmation, password reset)
- Designed responsive, server-rendered pages with Pug and CSS, and added interactive maps using Leaflet.js
- Deployed backend on Heroku with MongoDB Atlas for scalability and high availability
- Applied security best practices with Helmet, data sanitization, CORS, and centralized error handling

Todo Application

Aug. 2025

Spring Boot, MySQL, React.js

- Built a full-stack task management system where users can add, update, delete, and mark tasks as complete
- Designed a REST API with Spring Boot (CRUD endpoints for tasks, user-based filtering, CORS integration) and connected it to a MySQL database for persistence

- Developed a React.js frontend with routing, authentication context, protected routes, and responsive UI for seamless task management
- Implemented user authentication and authorization to restrict access and enable personalized task views
- Deployed the backend on Heroku and frontend on Vercel
- Followed clean architecture principles with separation of concerns (Controller – Service – Repository) and applied secure coding practices

Tiffin Delivery Management System

Aug. 2024

JavaScript, React Native, Node.js, MySQL, React.js

- Developed a comprehensive meal subscription platform for managing tiffin delivery services
- Connected customers, providers, and delivery agents to streamline ordering, tracking, and delivery workflows
- Built cross-platform web and mobile applications with real-time order tracking, secure payment gateway, geolocation-based delivery, and push notifications
- Designed normalized database schema to handle user roles, subscriptions, orders, and delivery assignments
- Implemented real-time updates using WebSocket connections for live order status tracking

Internship Experience

MERN Stack Development Intern | Unified Mentor Pvt. Ltd.

Oct 2025 – Apr 2026

- Building modern web applications with React.js frontend and Node.js/Express backend architecture
- Designing and implementing database schemas in MongoDB with proper indexing and data validation
- Creating secure authentication systems with JWT, password hashing, and role-based access control
- Developing responsive UI components with React hooks, context API, and state management libraries
- Integrating RESTful APIs and handling asynchronous operations with proper error handling
- Writing clean, maintainable code following industry best practices and MVC architecture patterns
- Collaborating with cross-functional teams to deliver features aligned with business requirements
- Testing and debugging applications using modern development tools like Postman and Chrome DevTools

Full Stack Web Development Intern | Imagine Script Technologies

July 2023 – Dec 2023

- Developed and deployed multiple full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Collaborated with a team of 4 developers to build responsive and scalable e-commerce solutions for client projects
- Implemented RESTful APIs with authentication and authorization using JWT and session management

- Integrated third-party payment gateways (Razorpay) and email services for transactional workflows
- Optimized database queries in MongoDB, reducing response time by 30% for high-traffic endpoints
- Participated in code reviews, daily standups, and agile sprint planning to ensure timely project delivery
- Gained hands-on experience with Git version control, deployment on cloud platforms, and debugging production issues

Technical Skills

Programming Languages: Java, JavaScript (ES6+), Python, C++, SQL

Frontend Development: React.js, React Native, HTML5, CSS3, Bootstrap, jQuery

Backend Development: Spring Boot, Node.js, Express.js, Django

Databases: MySQL, MongoDB, PostgreSQL

Authentication & Security: JWT, Spring Security, Role-Based Access Control, OAuth2, Helmet, CORS, Data Sanitization

APIs & Integrations: RESTful APIs, Stripe, Razorpay, SendGrid, Firebase, Geolocation API

Tools & Platforms: Git/GitHub, Android Studio, Postman, Heroku, Vercel, MongoDB Atlas

Core Competencies: Problem Solving, Object-Oriented Programming (OOP), Web Development, Mobile App Development, Team Collaboration

Certifications

- Master Spring Boot 3 & Spring Framework 6 with Java — Udemy (2024)
- Mastering Data Structures & Algorithms using C and C++ — Coursera (2021)
- Node.js, Express, MongoDB & More: The Complete Bootcamp 2023 — Udemy (2023)
- The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert — Udemy (2023)
- The Complete Full-Stack Web Development Bootcamp — Udemy (2022)
